

CR Dental Solution for Agfa's CR30-X Digitiser

Agfa Healthcare have released a Veterinary Dental solution for the CR30-X (only) that comprises a CR DD1.0T Vet Cassette (15 x 30cm) with tray and adaptor for intra-oral plates of sizes S0, S1, S2, S3 and S4.

CURIX Ortho HT-G Film

High-speed, medium-to-high contrast film for use with green intensifying screens.

E.O.S. Chemistry

Environmental friendly developer and fixers.

Personal Radiation Protection

Choose from a large range of styles, sizes, colors and patterns, which also includes selection of lead equivalency for maximum comfort and protection to suit the application. Our personal radiation protection also extends to eyewear, gloves, thyroid collars and general radiation shielding.

Positioning Aids

A comprehensive range of foam positioning aids from our standard sizes to customised shape and size to meet specialised needs. These can also be supplied covered with anti-bacterial PVC hospital sheeting.

Whether you are looking at CR (computed radiography), DR (direct radiography) or x-ray systems, we offer a range of proven solutions that provide excellence in diagnostic imaging and are backed by our commitment to customer service and support.

Digital Imaging Has Never Been Easier

TMIS offer a Choice of Systems to suit any Budget !

CR 30-X

The CR 30-X is a highly versatile high throughput digitiser. It offers an ideal solution for any private or de-centralised CR environment, especially with a high volume of imaging. The CR 30-X can handle all general radiology, orthopedics, chiropractic, full leg/full spine, veterinary and veterinary dental applications and combined with the NX workstation and Agfa HealthCare's gold standard MUSICA² image processing software it delivers outstanding workflow and image quality.

CR 10-X

The affordable, compact CR 10-X digitiser is designed as an ideal solution for Veterinary Practices. When combined with the NX workstation and MUSICA² image processing software it offers a cost effective entry into digital radiography without compromising on image quality.

DX-D 10

Maximize your existing imaging investment with our DR (Direct Radiography) upgrade solution. An affordable, quick and easy installation that provides you with a cassette-less workflow combined with superb image quality empowered by MUSICA² image processing software.

Static X-Ray Systems Analogue, CR or DR

ZooMax X-Ray System

ZooMax White X-Ray Systems are easy to use with anatomically programmed controls at your finger tips on the x-ray tube head. A four way floating table top with foot operated brakes makes positioning a simple task.

Standard output is 30kW (100kV @300mAs) in both the 3 phase high frequency model and the optional single phase 240V stored energy model. Short exposure times reduces motion artifact, such as respiration and cardiac blurring. A fine line grid fitted in the under table bucky ensures good x-ray scatter clean up on larger animals.

Upgrading to Digital Imaging ?
Order your ZooMax White X-Ray System with Agfa DX-D DR (Direct Radiography) Detectors.

CONTROL-X
MEDICAL

Thinking of Upgrading your old X-Ray Unit ?

PXP-20HF PLUS

1.6kW, 100kV/20mA

PXP-40HF

2.4kW, 100kV/35mA

PXP-60HF

3.2kW, 100kV/60mA

PXP-100CA

5.0kW, 110kV/100mA

Total Medical Imaging Solutions now offer a comprehensive range of High Performance Poskom Portable and Mobile X-ray Units to suit every veterinary application. All units are high frequency with high output, that ranges from 1.6kW up to 5.0kW.

POXBILE 100BT

5.0kW, 110kV/100mA
Battery powered

PXMS Mobile Stand

VT-20 X-Ray Table

Is your existing X-ray unit in good order ?
Then why not update to the latest digital technology utilising Agfa's DX-D Retrofit DR (Direct Radiography) with a choice of tethered or wireless solutions.
